

Sporting Goods Retail

- *The global market for sporting goods is expected to reach USD 303 billion by 2015, according to Global Industry Analysts, driven in part by sports' growing popularity among young people and women*
- *The US retail sporting goods industry includes about 17,000 companies with combined annual revenue of about USD 40 billion.*

Large chains have an advantage in stocking a wide variety of goods. Small companies and specialty sports retailers can compete successfully by carrying a deeper product line in specialized sports, hiring experienced staff, offering repair services or by serving a local market.

The buying patterns are largely influenced by popular sport in the area, population demographics and the disposable income.

Ever changing models of sports equipment, an extremely cost sensitive consumer, stiff competition from departmental store with well-appointed sports goods departments; as well as general merchandise discounters such as Wal-Mart, exert additional pressure on the sports goods retailer to remain competitive.

Ability to collate, analyze and act on consumer preferences, sales trends and keep track of changes in sporting equipment are imperative to succeed in the sports goods retail industry.

A Sports Goods Retailer is faced with the challenge to:

- Keep in touch with the sports industry – ensuring that the stores have the right mix of equipments and their models & sizes
- Provide After Sales and Repair Services
- Manage inventory levels cautiously and judiciously
- Periodically run promotions, campaigns and sports events to increase visibility thereby increasing footfall
- Remain closer to the consumer and analyze his preferences and overall sales trends

Such a balance requires an integrated business management solution that allows flexibility to cater to the diverse & unique demands of Sports Goods Retailers. A system that seamlessly integrates all business processes from the POS at store to the planners at the Head Office lowering the overall cost of operations, simplifying expansion and enabling the Sports Goods Retailer maintain his unique proposition and positioning.

BENEFITS

Stay connected with your business operations

iVend Retail comes as an end-to-end business solution for sports goods retailers seamlessly integrating point of sale, in store inventory management, logistics, back office store and head office processes.

iVend integrates with SAP Business All-in-One and SAP Business One for head office operations and is an extensive retail management application to manage store and POS operations. The failsafe integration with SAP keeps the head office always connected with the store operations across the complete retail chain.

Inventory control and replenishment

Head office operations get complete visibility of stock across the retail chain and can effectively push stock rather than relying on store requisitions. Additionally the merchandising department can raise purchase orders in time to avoid stock out situations.

Store Managers and POS operators can gain complete visibility of stock across stores or at the main warehouse / distribution centers right from the POS interface.

Promotions that maximize profitability

Manage targeted promotions in multiple formats by easily analyzing detailed customer trends at individual stores and across the retail chain.

Retain customers and manage customer communication

The loyalty management module in iVend allows you to define flexible / attractive campaigns, ensuring customer loyalty.

Get a full range of analytics and service capabilities that help you better understand customer's trends and design promotions that maximize the potential of all your customer relationships by informing customers of available points, their value and their validity.

Grow your average sales ticket

Pop Ups for Up sell & Cross Sell and Promotions based on sale total at the POS interface enabling the POS operator to make additional recommendations to the customers.

Smoothly process routine and complex transactions

Combine multiple transaction types with in single POS transaction. POS operators can process a sale refund and sale transaction in a single transaction rather than a two-step process.
